installation

If you dislike carrying firewood up from the basement and through the house and hate cleaning up wood chips afterwards, the **Woodwaiter** is the ideal solution for you!

With its rugged construction, simple installation and built-in safety features, the Woodwaiter is an efficient electric unit for moving firewood from the basement to floor level.

- moves wood, groceries or other inanimate objects from basement to floor level
- runs quietly
- is built to handle standard 16" or 24" wood
- is labour saving
- is key operated and relay controlled
- is locked securely when the key is removed
- can be set at any convenient loading height
- can be installed in any house with sufficient clearance
- has a built-in circuit breaker that will automatically stop the unit if overloaded or jammed
- can be installed simply by the home handyman,
- no special tools required
- is shipped tested and assembled
- the 4 sides of the wood box could be made out of sheet metal for lifting pellets or other loose materials
- the woodwaiter hangs from floor joists and is not attached to the basement floor
- CSA approved in Canada and United States
- warranted for 5 years.
